ANTI SALOON LEAGUE TRANSACTS BUSINESS

THE LEAGUE MET YESTERDAY AFTERNOON AT THE Y. M. C. A. AND ADOPTED IMPORTANT RESOLUTION.

The Anti-Saloon League met yesterday afternoon in the parlors of the Y. M. C. A. There were a large number of the workers present.

The Agitation Committee reported the plan of action in regard to having weekly articles in the daily newspapers of Honolulu on the liquor question by people about town. The plan is well under way and the first articles were well received.

The committee on securing the votes to sign a pledge against low license reported through the chairman, John M. Martin, that more than fifty per cent of the voters had signed the pledge.

The league then moved that the Agitation committee be instructed to write to every candidate for the Legislature and ask him to state his position on the saloon question. This was carried and it will be done.

The League then passed the following resolution:

Whereas, The Anti-Saloon League has failed to receive from the present Police administration the co-operation which it has the right to expect in the enforcement of the present liquor laws;

Therefore, We appeal to the voters of Oahu county in the coming election to cast their ballots in favor of a reform administration.

Y. M. C. A. RECEPTION.

Tonight there will be a grand reception at the Y. M. C. A. at which the Y. M. C. A. will assist. The reception is to welcome the new secretary of both institutions. A good program has been arranged for the occasion. Among those appearing will be Dr. Ramus, Violinist Marx, Mrs. Judge Whitney, Miss White and Miss Paty. Refreshments will be served and a good time generally is expected. You are welcome.

TO FORETELL EARTHQUAKES

AMERICAN SCIENTIST PERFECTING INSTRUMENTS TO ACCOMPLISH DESIRED END.

Frank A. Perret, the American scientist, stationed with the famous Professor Matteucci at the Royal Observatory on the slope of Mount Vesuvius, and who stuck to his post at grave peril to his life during the ten days' eruption in April, announces for the first time the scientific results of his daring exploit.

Mr. Perret expressed the opinion that one of the fruits of the observation would be the invention of instruments not now in existence that would forever prevent the recurrence of such a calamity as recently visited the Neapolitan cities or such as exterminated the inhabitants of Pompeii and Herculaneum in the first century. The eruptions cannot, of course, be suppressed by mechanical means, but the scientists believe they can be so accurately foretold, both as to the time of the eruption and the path of the lava stream, that loss of life need never occur again.

"The most important results to science," said he, "was the demonstration of the inefficiency of all modern recording instruments. Not only did the instruments fail at times to record any of the vibrations, but they frequently recorded them falsely. I am now at work on some new instruments which I think will fill the deficiency and also enable us to forecast the immediate conduct of the volcano."

Pressed for details, he said he had plans for two instruments in mind. One was to test the crust of the mountain slopes in order that it could be told in advance where it was mostly likely to break. If the weak spot was on the eastern slope, the cities to the west would have little cause for alarm for the lava would flow in the opposite direction. If the western side seemed most liable to split, they would be told to flee.

The second proposed instrument would, he believed, determine the condition of the lava, gases, etc., in the interior of the crater so as to foretell any violent eruption, regardless of the territory endangered. The observer said that he thought this was possible without connecting with the crater at all. Tremors of a certain character in the surface rocks, if accurately recorded, would give unmistakable evidence of an outburst.

SMUGGLING CHINKS ACROSS THE BORDER

BIG SCHEME DISCOVERED IN CANADA TO ENABLE CHINESE TO ENTER UNITED STATES.

BOSTON, October 1.—The immigration authorities have just discovered a gigantic plan to smuggle Chinese into the United States by way of Newfoundland. The discovery of the attempted operations is largely due to the skill and aggressiveness of A. P. Schell, for some time head of the Chinese inspection service in New England.

Owing to the \$500 head tax imposed by Canada the Chinese fled to Newfoundland as a temporary refuge. The Newfoundland Government having decided to impose a \$100 head tax, the Chinese next prepared to enter the United States. Within such a fortune within apparent easy reach a number of desperate men have been found ready to handle the undertaking.

United States secret service men are shadowing the agents of the syndicate here in their hope that their movements will betray the proposed landing place of the smugglers.

Inspectors have also discovered Chinese training schools at Montreal, where Chinese are carefully coached for entrance into the United States and trial before the United States courts on deportation charges.
